

KITTING + FORECASTING

KITTING

We design and prepare customized repair kits for our clients based on individual and shared forecasting results. Having the right parts available immediately is essential to conducting the maintenance and inspection activities necessary to keep aircraft operational.

BENEFITS INCLUDE :

- ✓ Reduced procurement costs & related expenses
- ✓ Reduced resources needed
- ✓ Reduced inventory & variable costs
- ✓ Increased flight availability

FORECASTING

Using data developed specifically for legacy aircraft, we provide clients occupying key positions in the aircraft procurement industry with a shared or personalized portrait and analysis of anticipated aircraft behaviour. Your maintenance operations should never be compromised due to a missing part.

BENEFITS INCLUDE :

- ✓ Reduced total cost for end user
- ✓ Increased asset utilization
- ✓ Increased service capability
- ✓ Enhanced financial control
- ✓ Mitigated obsolescence
