

C-130 MICROVANES™ CARBON NEUTRALITY INITIATIVE

Has your Country signed the U.N. Climate Change initiative?
Microvanes™ can help you achieve your carbon reduction targets.

THE FUTURE IS GREEN

A typical C-130 aircraft with Microvanes™ installed will produce over 370,000 lbs less carbon emissions per year.

SUPPORTING GLOBAL EFFORTS

Winner of the 2018 Laurate award for supply innovation, Microvanes™ are an OEM product designed by Metro Aerospace.

Here is what makes Microvanes™ unique:

- Aligned with the EU initiatives
- A long-term solution for increased sustainability
- Improved carbon footprint with aircraft drag reduction
- Aerodynamic performance extensively evaluated
- CFD drag reduction verified
- Proven significant reduction in fuel costs
- Reduction in wear on engine and accessories
- Increased payload capacity
- Affordable-quick return on investment.

Demonstrate your commitment to carbon reduction by contacting us now for the latest pricing information. Be amongst the leading C-130 operators making a real difference with cleaner, better performing aircraft.

MICROVANES™ ARE PROVEN TO REDUCE CARBON EMISSIONS WHILE INCREASING ROI

MHD-ROCKLAND in conjunction with Metro Aerospace is proud to distribute this solution to the international C-130 community.

Microvanes™ can minimize aircraft drag, while significantly improving the carbon footprint. After 10 years of exhaustive testing, a proven product is now available that provides operators long-term solutions for a more sustainable future.
